

**agroguard**®

**long-life  
advanced**

**crop-protection netting**

**Long-life, advanced,  
crop-protection netting**

**Agroguard®** Was specifically designed as an excellent alternative to non-woven fabrics and plastic films.

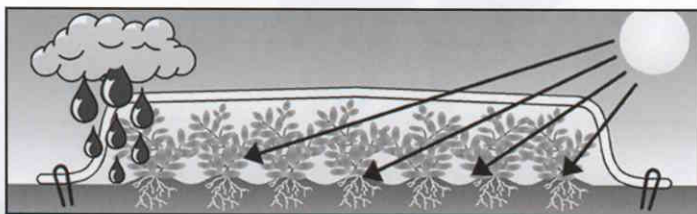

**Agroguard®** Has been extensively tested on a large scale. It has proven its qualities and advantages both as a stand alone crop cover, and in combination with non-woven fabrics.

#### **Agroguard® Applications:**

- Covering of early planted crops in the spring, such as Brassica's, Potatoes and Cut-flowers (Advance cropping)
- Covering of frost sensitive plants
- Winter protection of Flower Bulbs, Nursery Stock, Brassica's, Calabrese and many other crops
- Protection of Seed Beds
- Protection from Heavy Rain, Hail and Wind
- Protection from Pigeons, Rabbits, Hares and Deer
- Protection from most Insects

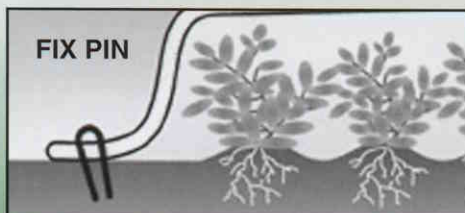

#### **Agroguard® Qualities:**

- Doesn't tear. Extremely strong (38gr/m<sup>2</sup>) It can be used for many years if handled properly, therefore low annual costs (5-6 year life expectancy is not unusual)
- UV - Stabilized
- Environmentally friendly due to long life expectancy
- Creates an ideal Micro-Climate because **Agroguard®** :
  - ✓ Is Permeable to Water and Fresh Air
  - ✓ Retains radiant heat resulting in higher night-time temperatures
  - ✓ Lightly shades the crop during the day (14% Shade)
- More Even Growth and Maturity of Crop
- Higher percentage of Class 1 Produce
- No excess Water retention on the fabric surface, No puddles or run-off problems, Can easily be removed and moved, even after rain
- Low Wind sensitivity
- Available in a wide range of Widths and Lengths
- Can be fixed down by special Fix-Pins

#### **Dimensions Available**

4 mtr x 200 mtr
6 mtr x 200 mtr
8 mtr x 200 mtr
12 mtr x 100 mtr
16 mtr x 100 mtr
