

GARLIC BARRIER *Garshield*

WHY USE GARLIC BARRIER *Garshield*

GARLIC BARRIER *Garshield* is a unique blend of garlic and citrus extracts. It contains high levels of allicin, as well as over 30 other sulphur-based nutrients and selenium. The citrus extracts due to their high levels of bioflavonoids and ascorbic acid exhibit antibacterial, fungistatic and fungicidal properties; therefore complement the properties of the garlic extract perfectly. These extracts act synergistically delivering immediate results.

GARLIC BARRIER *Garshield* is a high quality natural product, concentrated and standardised. It acts primarily by contact action and preventatively.

When **GARLIC BARRIER *Garshield*** is used regularly in a programme of treatments it will stimulate growth and give healthier, more vigorous plants. Such integrated crop management treatments are used on various protected crops such as tomatoes, lettuce, strawberries, and ornamentals as well as, field crops including lettuce, swedes and top fruit.

HOW TO USE GARLIC BARRIER *Garshield*

Use **GARLIC BARRIER *Garshield*** regularly every 7-14 days especially when conditions are conducive to bacterial or fungal diseases.

Dilute 1 in 100 litres of water and apply as a fine spray to run off. To improve rainfastness **GARLIC BARRIER *Garshield*** may be mixed with Codacide oil (1:1). Repeat spraying every 7-14 days.

BENEFITS OF GARLIC BARRIER *Garshield*

Stimulation of growth. Growers have found that applied in a programme of treatments **GARLIC BARRIER *Garshield***, stimulates the immune system of plants, gives vigour and helps to resist the adverse effects of stress.

Fungal suppression. Regular use of **GARLIC BARRIER *Garshield*** will assist crops to resist or recover from most of the common fungal diseases.
