

GARLIC BARRIER *Standard*

WHY USE GARLIC BARRIER *Standard*

GARLIC BARRIER *Standard* is a natural product derived from garlic extract. It is water based, concentrated, standardised and high quality. It contains high levels of allicin, as well as, over 30 other sulphur-based nutrients and selenium that will stimulate plant growth. **GARLIC BARRIER *Standard*** has systemic and prophylactic action. It also has a very low content of solids making it ideal for drip irrigation.

HOW TO USE GARLIC BARRIER *Standard*

For optimal results **GARLIC BARRIER *Standard*** should be used from early on in the growing season, up to and during harvest. The exact quantity depends on crop type, growing stage, environmental conditions and desired result. Using high doses at regular intervals (pulsing) can be a very useful tool in managing growth. During summer or where a higher sulphur content product is required we recommend the use of **GARLIC BARRIER *Plus***.

GARLIC BARRIER *Standard* can be used either through a drip irrigation system or sprayed on as a fine spray diluted 1:100 in water. To improve rain fastness when spraying, Codacide oil may be added to the mix (up to 1:1 to **GARLIC BARRIER**). For specific crop protocols contact your local distributor or GARLIC FARMS (UK) Ltd.

BENEFITS OF GARLIC BARRIER *Standard*

Stimulation of growth. Applied in a programme of treatments **GARLIC BARRIER *Standard*** will stimulate growth, vigour and tillering giving strong, healthier and compact plants. **GARLIC BARRIER *Standard*** also helps crops to resist the adverse effects of stresses due to drought and unbalanced nutrition and assists in optimising the effects of fertilisation.

Insect repellence. Regular **GARLIC BARRIER *Standard*** applications aid plant's natural resistance to insects such as whitefly, thrips, and aphids.

Fungal suppression. Regular use of **GARLIC BARRIER *Standard*** will assist crops to resist or recover from most of the common fungal diseases. Research worldwide has shown garlic's fungistatic and fungicidal activity against *Fusarium oxysporum*, *Phytophthora spp.*, *Phythium spp.*, *Rhizoctonia solani*, *Botrytis cinerea*, *Alternaria brassisicola*, *Sclerotinia sclerotiorum* and numerous other pathogenic fungi.
