

OMEX SW7

Silicone Based Wetter

SW7 is a non ionic liquid wetting and spreading agent. It has been specifically designed to aid the uptake of foliar nutrients applied to the leaves, enhance the efficacy of crop protection products by ensuring greater coverage, and supply a source of silicon.

Omex SW7 is suitable for a wide range of agricultural and horticultural crops, including soft fruit, field vegetables, potatoes and ornamental and nursery stock plants.

SW7 can be mixed with a wide range of foliar nutrients and many crop protection products. Always consult the appropriate product guide before use. It is suitable for dilution with both hard and soft water. The required quantity of SW7 should be added to the spray tank and agitated thoroughly.

Application rates

Crop	Rate	Timing
Lettuce	0.1-0.25 %	any time
Brassicas	0.1-0.25 %	any time
Peas & beans	0.1-0.25 %	any time
Strawberries & raspberries	0.1-0.25 %	any time, care should be taken during flowering
Potatoes	0.1-0.25 %	any time

Water volume (l/ha)	Required quantity of Omex SW7		
	0.1 % SW7	0.15 % SW7	0.25 % SW7
200	200 ml	300 ml	600 ml
400	400 ml	600 ml	1 litre
600	600 ml	900 ml	1.25 litres

Maximum rate of SW7 is 1.25 L/ha. Minimum water volume is 200 L/ha water

Unit sizes available: 1 litre
